## POLICY/REGULATION DEVELOPMENT

### Evidence of Colleen Norris' Research Uptake/Impact (Policy Citations and Clinical Guidance)

Dr. Colleen Norris has authored 49 publications that have been cited by 79 policy documents. In total, she has received 89 policy citations. Forty-seven of these documents are documents that provide guidance around clinical care. The strength and relevance of Dr. Norris' work can easily be seen by the organizations that cite her research. Some of these organizations are the World Health Organization, the OECD (Organisation for Economic Co-operation and Development), the Public Health Agency of Canada, The Royal Society of Canada, Canada's Drug Agency (formerly known as the Canadian Agency of Drugs and Technologies in Health), the Health Foundation (UK), European Society of Cardiology, the Canadian Cardiovascular Society, and the American Heart Association. Some of the Clinical Practice Guidelines citing her research include 8 Cochrane Systematic Reviews, 18 guidelines from the National Institute for Health and Care Excellence (NICE), and guidelines from the European Union, Malaysia, and the Netherlands.-Dr. Norris is a scientist whose work all Canadians can be proud of and that has likely actually improved the lives and well-being of our population, particularly for women.
