**2. PROFESSIONAL POSITIONS**

1986-present: University of Alberta  
 Professor Emeritus (2024-present)  
 Full Lecturer, Mathematical and Statistical Sciences (2024-26)  
 President, Association of Academic Staff University of Alberta (2003-04, 2022-26)  
 Project Coordinator for Faculty of Science (2006-07)  
 Director, Applied Mathematics Institute (1999-2000)  
 Associate Chair (Graduate Studies & Research), Mathematical Sciences (1996-99)  
 Associate Director, Institute for Geophysical Research (1995-98, 2012-18)  
 Professor of Mathematical and Statistical Sciences (1993-2024)  
 Associate Professor of Mathematics (1990-93)  
 Assistant Professor of Mathematics (1986-90)

1985-86: Post-Doctoral Research Associate, Department of Earth, Atmospheric and Planetary Sciences, Massachusetts Institute of Technology.

1979-81: Centre for Cold Oceans Resources Engineering, Memorial University, St. John's, Newfoundland. Staff Researcher. R&D position directed toward development of computational models of sea ice and iceberg drift in the Labrador Sea.

**2A. CONCURRENT VISITING POSITIONS**

1996 (Feb): Visiting Researcher, National Center for Atmospheric Research (NCAR), Oceanography Section, Boulder, USA.  
 1996 (July, Sept): Invited Participant, Atmosphere and Ocean Dynamics Programme, Isaac Newton Institute for the Mathematical Sciences, Cambridge, UK.  
 2001 (June): Visiting Researcher, French Institute for the Research and Exploitation of the Sea (IFREMER), Brest, France.

### 3. DISTINCTIONS

- 2007: *CAIMS\*SCMAI Research Prize*, Canadian Applied and Industrial Mathematics Society
- 1998, 2001: *Area of Established Research Excellence in Fluid Dynamics and Transport Phenomena*, University Research Policy Committee and Vice-President (Research), University of Alberta
- 1996: *Killam Annual Professorship*, University of Alberta
- 1996: *Faculty of Science Research Award*, University of Alberta
- 1995: *McCalla Research Professorship*, University of Alberta
- 1994: *President's Prize*, Canadian Meteorological and Oceanographic Society
- 1984: *Graduate Student Prize*, Canadian Meteorological and Oceanographic Society

### 4. EDUCATION

- 1983-85: University of British Columbia, Vancouver, BC, Canada. PhD in Applied Mathematics & Physical Oceanography. Thesis (supervised by Professor L. A. Mysak, *CM, FRSC*): *On the stability and propagation of barotropic modons in slowly varying media.*
- 1981-83: University of British Columbia, Vancouver, BC, Canada, MSc in Applied Mathematics & Physical Oceanography; Thesis (supervised by Professor L. A. Mysak, *CM, FRSC*): *Topographically induced baroclinic eddies along a coast.*
- 1973-78: University of Waterloo, Waterloo, ON, Canada. B. Math. (Hons.) in Applied Mathematics.

### 5. PUBLICATIONS

One book and 111 *refereed* articles. See attached list.

### 6. RESEARCH GRANTS

Total individual and team funding has exceeded \$7.75M in *peer-reviewed* grants. See attached list.

### 7. INVITED ADDRESSES

Sixty-four *invited* seminars in *fifteen* countries. See attached list.

### 8. GENERAL RESEARCH INTERESTS

One can characterize ocean currents into two broad groups. The first are the wind-driven currents. These currents are most intense near the surface of the ocean. Their principal role is to transport warm equatorial waters toward the Polar Regions. The second group of currents consists of those driven by density contrasts with the surrounding waters. Among these are the deep, or abyssal, currents flowing along or near the bottom of the oceans in narrow bands. Their principal role is to transport cold, dense waters produced in the Polar Regions toward the equator.

My research group is working toward understanding the low frequency baroclinic dynamics of abyssal ocean currents. In particular, we develop innovative mathematical and computer models to describe the evolution, including the transition to instability and interaction with the surrounding ocean and bottom topography, of these flows. The goal of this research is to better understand the temporal variability in the planetary scale dynamics of the ocean in Earth's climate system.

Our work can be seen as “theoretical” in the sense that we develop new models to elucidate the most important dynamical balances and “process-oriented” in the sense that we use these models to make concrete predictions about the evolution of these flows. As such, our work is a blend of classical applied mathematics, high-performance computational science and physical oceanography.

#### 8A. CURRENT RESEARCH

Dynamics of ocean currents, fronts and eddies, and wave-wave and wave-mean flow interactions.

#### 9. REFEREEING

#### 9A. GRANT REFEREEING

NSERC operating, research and discovery grants, NSERC women's faculty research awards, NSERC strategic and research network grants, Israel Science Foundation, International Science Foundation, Australian Research Council, National Science Foundation (USA), Natural Environment Research Council (UK), Internal Reviewer for CFI applications, United States-Israel Binational Science Foundation, Canadian Foundation for Climate and Atmospheric Sciences, Qatar National Research Fund, Banff International Research Station.

#### 9B. EDITORIAL BOARDS AND JOURNAL REFEREEING

##### **Editorial Boards**

- *Atmospheric and Oceanographic Sciences Library Series*, Springer (2001-21),
- *Advances in Fluid Mechanics*, WIT Press (2004-10, 2013-16),
- *Canadian Applied Mathematics Quarterly* (1996-2000),
- *International Journal of Applied Mathematics and Engineering Sciences* (2005-present).
- Co-Editor in Chief: *Canadian Applied Mathematics Quarterly* (1999-2000).
- College of Reviewers, *Canada Research Chair Program* (2003-present)

##### **Journal Refereeing**

Atmosphere-Ocean, Geophysical and Astrophysical Fluid Dynamics, Journal of Fluid Mechanics, Physics of Fluids, Journal of Marine Research, Journal of the Australian Mathematical Society (Series B), Dynamics of Atmospheres and Oceans, Quarterly of Applied Mathematics, Journal of Physical Oceanography, Oceanologica Acta, SIAM Review, Liege Colloquium on Ocean Hydrodynamics (Elsevier Oceanographic Series), Canadian Applied Mathematics Quarterly, Journal of Nonlinear Science, Journal of Mathematical Analysis and its Applications, Deep-Sea Research, SIAM Journal of Mathematical Analysis, Theoretical and

Computational Fluid Dynamics, Journal of Engineering Mathematics, Fluid Dynamics Research, Surveys in Geophysics, ASME Journal of Fluids Engineering, Proceedings of the Royal Society of London A, Indian Journal of Mathematics, Journal of the Atmospheric Sciences, Quarterly Journal of the Royal Meteorological Society, Applied Mathematics Letters, Ocean Modelling, Geophysical Research Letters, Nonlinearity, Ocean Science, Environmental Fluid Mechanics, Ocean Dynamics, Mathematical Problems in Engineering, Fluids.

## 10. TRAINING OF HIGHLY QUALIFIED PERSONNEL

- 5 PhD and 16 MSc students. See attached list.
- 5 Undergraduate Summer Research Assistants. See attached list.
- 2 Computer Systems Analysts. See attached list.

## 11. TEACHING ACTIVITIES

- Lectured various undergraduate and graduate courses in Mathematics and Fluid Dynamics.
- Teaching evaluations are consistently in the top 25<sup>th</sup> percentile in the Faculty of Science.
- Updated and modernized the course syllabus for the two-term 4<sup>th</sup>-year Honours Applied Mathematics courses in “Intermediate Partial Differential Equations” (Math 436 and 438).
- Created graduate courses in *Hydrodynamic Stability Theory* (ref. Drazin & Reid), *Nonlinear Waves* (refs. Whitham; Drazin & Johnson), and *Geophysical Fluid Dynamics* (refs. Pedlosky; LeBlond & Mysak) (Math 664).
- Founder of weekly nonlinear waves/fluid dynamics research seminar in the Department of Mathematical and Statistical Sciences, University of Alberta.

## 12. UNIVERSITY, PROVINCIAL and NATIONAL ACADEMIC COMMITTEES

- 1986-present: Numerous departmental committees, e.g., Executive Committee, Graduate Studies, Applied Mathematics Council, Liaison with Physical Sciences, Liaison with Faculty of Engineering, Publicity Co-ordinator and Newsletter Editor for Applied Mathematics Institute, Mathematics Computer Committee, Executive of the Applied Mathematics Institute, Computer Co-ordinator for Applied Mathematics Institute, Acting Director of Applied Mathematics Institute, Hiring Committee, Acting Chair of Department of Mathematical Sciences, Acting Site-Director for Pacific Institute for the Mathematical Sciences (PIMS), Long-term Hiring Plan Committee, Liaison with Earth and Atmospheric Sciences
- 1987-89: Faculty of Science Salary and Promotions Committee
- 1988-89: Hiring Committee for Department of Geography (Meteorology)
- 1990-97: University of Alberta Numerical and Graphics Intensive Computer Users Group
- 1993: Selection Committee for Director, Applied Mathematics Institute
- 1993: Selection Committee for Director, Institute for Geophysical Research (also 1998, 2005)
- 1994-95: Faculty of Science representative to Faculty of Agriculture, Food and Nutritional Science
- 1995-96: Hiring Committee for Department of Earth and Atmospheric Sciences (also 1998-99)
- 1996: Chair, Selection Committee for Director, Applied Mathematics Institute

- 1996-present: AASUA Council
- 1997-98: FGSR Task Force on Grading in Graduate Courses
- 1997-99: FGSR Academic Appeals Committee
- 1998-2000: Multimedia and Advanced Computational Infrastructure (MACI), Management Team
- 1998-99: President, Faculty Club
- 1998: PIMS Steering Committee
- 1999: Chair Selection Committee, Department of Marketing, Business Economics and Law, Business
- 1999: Presidential Review Committee
- 1999-2001: FGSR Graduate Scholarship Committee
- 1999: McCalla Research Professor Selection Committee
- 1999-2000: Hiring Committee for MACI Project Manager (FSO III, appointed as Professor of Physics)
- 1996-2002: AASUA Salary Committee (also 2014-present; Chair 2000-02, 2016-17)
- 1999-2005: AASUA Executive (also 2012-present)
- 2001-02: AASUA Compensation negotiating team (also 2004-05, 2007-08, 2010-11, 2012-13, 2014-16)
- 2002-09: AASUA Sponsor Representative to Universities Academic Pension Plan (also 2022-present)
- 2002-04: Confederation of Alberta Faculty Associations (CAFA), Council (also 2022-24)
- 2002-03: AASUA Vice-President
- 2003: Petro-Canada Award Selection Committee (Faculty of Science)
- 2003-04: Treasurer, CAFA (also 2022-24)
- 2003-04: General Faculties Council (also 2022-24)
- 2003-04: AASUA delegate to Canadian Association of University Teachers (CAUT) (also 2022-24)
- 2003-04: Advisory Group on Teaching and Research, VP (Research)
- 2004-05: Presidential Advisory Search Committee
- 2004-05: AASUA Past-President
- 2004-11: Stakeholder Committee for Centennial Centre for Interdisciplinary Science
- 2006: General Appeals Committee (Presidential Appointee)
- 2008-09: Supplementary Pension Plan Implementation Committee (AASUA/Administration)
- 2008-20: AASUA Past Presidents' Committee
- 2010-13: CAUT Collective Bargaining and Economic Benefits Committee (also 2014-17)
- 2010-present: AASUA Academic Faculty Committee (Vice-Chair 2012-14)
- 2013-present: Co-Chair, Academic Supplementary Retirement Plan Operations Committee
- 2013-present: Academic Supplementary Retirement Plan Management Committee
- 2014-present: Co-Chair, Academic Benefits Management Committee
- 2014-16: Chair, AASUA Benefits Committee
- 2016-17: Lead Negotiator, AASUA Agreement Review Committee to negotiate changes to the Collective Agreements to implement "Comprehensive Collective Bargaining"
- 2017-19: Lead Negotiator, AASUA Collective Bargaining Negotiating Team (also 2019-22)
- 2022-present: Trustee, CAUT Defence Fund

2023: Provost & Vice-president (Academic) Advisory Search Committee  
 2024: Presidential Advisory Review Committee

### 13. RESEARCH INSTITUTE MEMBERSHIPS

Applied Mathematics Institute, University of Alberta.  
 Institute for Geophysical Research, University of Alberta.

### 14. CONFERENCES, SYMPOSIA AND WORKSHOPS ORGANIZED

1. *Mathematics of Planet Earth: The Science of Data*. Held in Montreal, Canada as Union (U03) Symposium as part of the IUGG General Assembly during July 9 - 18, 2019. U03 had 6 invited speakers and 9 poster presentations. The U03 Symposium also hosted the IUGG Gold Medal Lecture. This symposium was co-organized with Ilya Zaliapin, USA; Yehuda Ben-Zion, USA, Malcolm Sambridge, Australia; Shin-Chan Han, China.
2. *Mathematics and Observations of Earth Systems and Climate Variability and Earth Systems Modelling*. Held in Prague, Czech Republic as Union (U3) and Joint Symposia (JM01/02), respectively, as part of the IUGG General Assembly during June 22 – July 2, 2015. U3 had 6 invited speakers and 15 contributed posters and JM01/02 had 7 invited speakers, 28 contributed talks and 17 contributed posters (co-organized with Yehuda Ben-Zion, USA; Ilya Zaliapin, USA; Roberto Carniel, Italy; Alexey Gvishiani, Russia; Ute Herzfeld, USA; Matthias Holschneider, Germany; Richard Peltier, Canada; Malcolm Sambridge, Australia; Daniel Schertzer, France; Nico Sneeuw, Germany.)
3. *Mathematical Tools and Methods in Geophysics: Geocomplexity*. Held in Melbourne, Australia as a Union Symposium as part of the IUGG General Assembly during June 27 – July 8, 2011. Six invited speakers and 41 contributed presentations (co-organized with Matthias Holschneider, Institute for Mathematics, University of Potsdam, Germany).
4. *Wave Phenomena IV*. June 14-18, 2010. Held at the University of Alberta. Sixteen major speakers and 70 participants (co-organized with Profs. A. B. G. Bush, R. V. Craster, T. B. Moodie and B. R. Sutherland, UofA).
5. *Overflows and Abyssal Currents*. July 22-23, 2009. Held in Montreal, Canada. Symposium was part of the Joint Assembly (July 19-29, 2009) of the International Association of Meteorology and Atmospheric Sciences (IAMAS), International Association for the Physical Sciences of the Ocean (IAPSO) and International Association of Cryospheric Sciences (IACS). Three invited speakers and 23 contributed presentations (co-organized with J. B. Girton, Applied Physics Laboratory, University of Washington, Seattle, USA).
6. *Variability and Mixing near Topography*. March 2-7, 2008. Held in Orlando, Florida. Symposium was part of the American Society of Limnology and Oceanography (ASLO) 2008 Ocean Sciences Meeting. Two major speakers, 7 contributed talks and 9 poster presentations (co-organized with G. G. Sutyrin, Graduate School of Oceanography, University of Rhode Island, USA).
7. *Wave Phenomena III: Waves in fluids from the microscopic to the planetary scale*. July 11-15, 2001. Held at the University of Alberta. Twenty-five major speakers and 150 participants (co-organized with Profs. A. B. G. Bush, T. B. Moodie and B. R. Sutherland, UofA).
8. *PIMS Graduate Math Modelling Camp*. May 24-29, 1999. Held at the University of Alberta. Six industrial Mentors and 30 invited graduate students from across Canada working on industrial mathematical and statistical problems.
9. *PIMS Graduate Information Weekend*. January 20-24, 1999. Held at the University of

Alberta. Fifteen invited undergraduate honours students from across Canada and 14 faculty speakers describing graduate study in pure and applied mathematics and statistics.

10. *Mini-symposium on Geophysical Fluid Dynamics*. May 30-June 1, 1997. Held at Fields Institute for research in Mathematical Sciences, Toronto. Five major speakers.
11. *Vortex Dynamics in the Atmosphere and Ocean*. May 11-13, 1993. Held at the Royal Netherlands Academy of Arts and Sciences, Amsterdam, NL. Ten major speakers and 60 conference participants (co-organized with Profs. B. Cushman-Roisin, Dartmouth College, US; G. F. van Heijst, Technical University of Eindhoven, NL and D. Dritschel, University of Cambridge, UK).
12. *Thirteenth Annual Conference of the Canadian Applied Mathematics Society*. Conference Theme: *Wave Phenomena II: Modern Theory and Applications*. July 15-18, 1992. Held at the University of Alberta. Fifteen major speakers and 200 conference participants (co-organized with Prof. T. B. Moodie, UofA).

## 15. NATIONAL AND INTERNATIONAL SCIENTIFIC COMMITTEES

- 2009-15: IAPSO representative on IUGG Commission for Mathematical Geophysics.  
 2009: Scientific Committee, 2<sup>nd</sup> International conference on high-Reynolds number vortex interactions (held August 31 – September 2, 2009 at the University of Brest, Brest, France).
- 2006-11: Scientific Working Group for Deep Ocean Exchanges with the Shelf, International Association for the Physical Sciences of the Ocean (IAPSO) and the Scientific Committee for Ocean Research (SCOR).
- 2004-10: Scientific Advisory Committee, International Conference on Advances in Fluid Mechanics (also 2013-16, held bi-annually at various European locations).
- 2007-11: Research Prize Committee, Canadian Applied & Industrial Mathematics Society (CAIMS) (also 2017-18).
- 2000-03: Board of Directors, Canadian Applied & Industrial Mathematics Society.  
 2000-01: Board of Directors, Rocky Mountain Mathematics Consortium.
- 1999-2000: Scientific Advisory Committee, Fifth International Symposium on Stratified Flows (held at UBC, July 10-13, 2000).
- 1995-97: Chair (1995-96), Doctoral Dissertation Award Committee, Canadian Applied & Industrial Mathematics Society (also 2000-03),
- 1989-96: Canadian Scientific Team Member, Surface Velocity Drifters Program, World Ocean Circulation Experiment (WOCE).
- 1989-91: Vice-President, Canadian Meteorological and Oceanographic Society (Alberta Chapter).

## TRAINING OF HIGHLY QUALIFIED PERSONNEL

### Graduate Students

#### PhD Theses

- N. Yonemitsu**, *The stability and interfacial wave phenomena of a salt wedge flow*, Department of Civil Engineering (Environmental Engineering Program), 293 pp., 1991.
- R. H. Karsten**, *Nonlinear effects in two-layer, frontal-geostrophic models of surface ocean fronts*, 275 pp., 1998.
- P. F. Choboter**, *Modelling the dynamics of abyssal equator-crossing currents*, 132 pp., 2002.
- M. K. Reszka**, *Baroclinic frontal dynamics in the presence of continuous stratification and topography*, 196 pp., 2003.
- A. D. Gervais**, *Nonlinear evolution of localized internal gravity wave packets: Theory and simulations with rotation, background flow, and anelastic effects*, 243 pp., 2023.

#### MSc Theses

- L. Yan**, *Propagation of frictionally-decaying barotropic modons over finite-amplitude topography*, Department of Geography (Division of Meteorology), 91 pp., 1989.
- W. C. Cree**, *Topographic de-phasing and amplitude modulation of resonant Rossby wave triad packets*, Department of Geography (Division of Meteorology), 130 pp., 1990
- N. R. Ek**, *Geostrophic scatter diagrams and the application of free mode theory to a Northeast Pacific blocking episode*, Department of Geography (Division of Meteorology), 112 pp., 1992.
- C. B. Ropchan**, *The role of negative energy waves in parallel shear flow instability in hyperelastic fluid-filled tubes*, 57 pp., 1992.
- F. W. Primeau**, *The effect of alongshore topographic variation and bottom friction on shelf wave interactions*, 118 pp., 1992.
- P. Timko**, *The turbulent dissipation of internal solitary waves in a continuously stratified fluid of finite depth*, 190 pp., 1995.
- C. G. Slomp**, *On the Hamiltonian structure, stability characteristics and finite-amplitude evolution of geostrophic fronts*, 247 pp., 1995.
- C. J. Mooney**, *Finite amplitude baroclinic instability of a mesoscale gravity current in a channel*, 202 pp., 1995.
- F. J. Poulin**, *Mesoscale gravity currents and cold-pools within a continuously-stratified fluid overlying gently sloping topography*, 185 pp., 1997.
- M. K. Reszka**, *Finite amplitude waves and eddy development on a baroclinically unstable front over sloping topography*, 189 pp., 1997.
- S. J. Ha**, *Finite amplitude development of time dependent abyssal currents*, 101 pp., 2005.
- M. R. Turnbull**, *Finite-amplitude instability of time-varying frontal-geostrophic currents*, 104 pp., 2006.
- J. W. Keating**, *Numerical simulations of buoyancy-driven abyssal ocean currents on the sphere*, 139 pp., 2009.
- C. R. Somayaji**, *Kelvin-Helmholtz instability of a bottom-intensified jet*, 89 pp., 2013.
- A. Kim**, *Cross-equatorial flow of grounded abyssal ocean currents*, 80 pp., Department of Physics, 2013.
- A. D. Gervais**, *Propagation and overturning of localized anelastic internal gravity wavepackets*, 101 pp., 2018.

### Undergraduate Student Supervision

- F. J. Poulin**. Developed X-based software for producing colour movies for hydrodynamic simulations (1993). Developed finite-difference numerical code for solving the nonlinear governing equations

describing hyperelastic fluid-filled tubes (1994). Developed a theory for topographically-induced secondary instability in a marginally unstable baroclinic flow (1995).

**M. Roshko.** Developed a numerical code for solving the three-wave interaction equations for a topographically-forced resonant triad of Rossby waves (1994).

**J. Nault.** Worked on laboratory experiments on the baroclinic dynamics of abyssal currents and eddies (2002).

### Technicians

**P. Karbaliotis,** 1994-96, Part-time Computer Systems Analyst.

**M. Duller,** 2003-05, Part-time Computer Systems Analyst.

## RESEARCH GRANTS

### Natural Sciences and Engineering Research Council of Canada (NSERC)

- 1987-2021: *Operating, Research and Discovery*, \$893,630.  
1991-92, 1994-95: *Equipment*, \$67,668.  
1990-96: *Collaborative Special Project*, \$1,091,000. (with P. H. LeBlond, UBC; W. G. Large, UBC/NCAR; R. E. Thomson, IOS and D. Krauel, RRCM)  
1994-95: *Equipment*, \$36,000. (with T.B. Moodie, R. Poliquin, H. van Roessel and S. Shen)  
1994-95: *Equipment*, \$57,707. (with D. Schmitt, J. Beamish, R. Creaser, R. Luth and T. Chacko)  
1993-96: *Infrastructure*, \$75,000. (with W. Allegretto, H. I. Freedman, T.B. Moodie, R. V. Moody, R. J. Tait and Y. S. Wong)  
1999-2000: *Equipment*, \$66,127. (with J. Bowman, A. Bush, E. Lozowski, T. B. Moodie, S. Shen and B. Sutherland)  
2008-09: *Research Tools and Instrumentation*, \$45,000. (with P. Myers, A. Bush, C. Haas, E. Lozowski, G. Reuter, B. Sutherland and J. Wilson)

### Intellectual Infrastructure Partnership Program (IIPP, Government of Alberta)

- 1998-99: *Major Equipment*, \$320,000. (with J. Schaeffer, J. Samson, M. Sacchi, F. Marsiglio, R. Sydora, M. Green, J. Buchannan, K. Nandakumar, R. Hayes, J. Yokota, J. Bowman, B. Sutherland, A. Bush and M. Klobukowski)  
1999-2000: *Equipment*, \$115,000. (with J. Bowman, A. Bush, E. Lozowski, T. B. Moodie, S. Shen, B. Sutherland and D. Zhu)  
1999-2001: *Major Equipment*, \$1,962,000. (with O. Beattie, M. Green, J. Samson, J. Schaeffer and Others)

### Canadian Foundation for Innovation (CFI)

- 1999-2002: *Major Equipment*, \$2,601,000. (with O. Beattie, M. Green, J. Samson, J. Schaeffer and Others)

### Department of Fisheries and Oceans of Canada (DFO)

- 1989-97: *Science Subvention*, \$98,100.  
Program terminated.

### Atmospheric Environment Service of Canada (AES)

- 1987-98: *Science Subvention*, \$143,870.  
1992-93: *Strategic Equipment*, \$80,000. (with E.P. Lozowski, J. Wilson and G. Reuter)  
Program terminated.

### Other

- 1986-87, 1994-95: UofA Central Research Fund, \$8,500.  
1999-2000: UofA Equipment, \$60,000.  
2015, 2016, 2022-24: AASUA funded research grants, \$137,116

INVITED SEMINARS

- 1986 Center for Meteorology and Physical Oceanography, Massachusetts Institute of Technology, Cambridge, USA  
Centre for Earth and Planetary Physics, Harvard University, Cambridge, USA
- 1987 Department of Meteorology, McGill University, Montreal
- 1988 Department of Physics (Atmospheric Physics Group), Imperial College of Science and Technology, UK  
20<sup>th</sup> International Liege Colloquium on Ocean Hydrodynamics, University of Liege, Liege, Belgium  
Institute of Meteorology and Oceanography, Rijksuniversiteit Utrecht, Utrecht, Netherlands  
Institute for Mathematics and Its Applications, University of Minnesota, Minneapolis, USA
- 1989 Department of Mathematics and Statistics, Simon Fraser University, Burnaby
- 1990 Canadian Applied Mathematics Society Congress, Halifax  
Department of Mathematics, University of Saskatchewan, Saskatoon
- 1991 Institute of Ocean Sciences, Patricia Bay Oceanographic Institution, Sidney  
European Geophysical Society Meeting, Oceanic Fronts Section, Wiesbaden, Germany  
NSF-CBMS Regional Conference on Nonlinear Waves, Orlando, USA  
International Union of Geodesy and Geophysics (IAPSO/IAMAP sections), Vienna, Austria  
Department of Physics, University of Toronto, Toronto
- 1992 Faculty of Technical Physics (Aeroacoustics, Instability and Vortices Group), Eindhoven University of Technology, Eindhoven, Netherlands  
Department of Meteorology, McGill University, Montreal  
Department of Physics, Memorial University, St. John's  
Bedford Institution of Oceanography, Halifax
- 1993 Canadian Applied Mathematics Society Congress, Toronto  
Department of Geography, University of Alberta, Edmonton
- 1994 Canadian Meteorological and Oceanographic Society Conference, Ottawa  
School for Earth and Ocean Science, University of Victoria, Victoria
- 1996 Canadian Symposium on Fluid Dynamics, Winnipeg  
Canadian Environmental Mathematics Workshop, London  
European Geophysical Society Meeting, Transport Phenomena Section, The Hague, Netherlands  
Atmosphere and Ocean Dynamics Program, Isaac Newton Institute for the Mathematical Sciences, Cambridge, UK  
Mini-symposium on Geophysical Fluid Dynamics, Melbourne, Australia  
National Center for Atmospheric Research (Oceanography Section), Boulder, USA  
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, UK  
Department of Mathematics, Hong Kong University of Science and Technology, Hong Kong  
Department of Mathematics, University of New South Wales, Sydney, Australia  
Department of Mathematics, University of Alabama, Tuscaloosa, USA  
Department of Earth and Atmospheric Sciences, University of Alberta, Edmonton
- 1997 Applications of Arnol'd Stability, Fields Institute, University of Toronto, Toronto
- 1998 Workshop on Gravity Currents in the Environment, Vancouver
- 1999 Vortical structures in rotating and stratified fluids symposium, Cortona, Italy
- 2000 5<sup>th</sup> International Symposium on Stratified Flows, Vancouver
- 2001 Canadian Applied and Industrial Mathematics Society Congress, Victoria  
IFREMER, Brest, France
- 2002 Canadian Fluid Dynamics Symposium, Calgary  
IAM-PIMS Distinguished Colloquium Series, UBC  
Nonlinear Processes in Geophysical Fluid Dynamics, Ensenada, Mexico
- 2004 Canadian Fluid Dynamics Symposium, Halifax  
Canadian Meteorological and Oceanographic Society Conference, Edmonton  
21<sup>st</sup> International Congress of Theoretical and Applied Mechanics, Warsaw, Poland
- 2005 Canadian Meteorological and Oceanographic Society Conference, Vancouver
- 2006 Advances in Fluid Mechanics VI, Skiathos, Greece

- Canadian Fluid Dynamics Symposium, Toronto  
“Coast-to-Coast Seminar: Live from Edmonton,” The Interdisciplinary Research in the  
Mathematical and Computational Sciences Centre, Simon Fraser University, Burnaby
- 2007 Canadian Applied and Industrial Mathematics Society Conference, Banff
- 2008 American Mathematical Society/Mathematical Association of America Joint Meeting, San  
Diego, USA  
Department of Applied Mathematics, University of Western Ontario, London  
Advances in Fluid Mechanics VII, The New Forest, UK  
Fields Institute Workshop on Nonlinear Wave Dynamics, Carleton University, Ottawa  
PIMS Workshop on Waves in the Atmosphere and Ocean, Simon Fraser University, Burnaby  
Canadian Mathematics Society Winter Meeting, Ottawa
- 2009 Fields Institute Workshop on Dynamics in Environmental and Geophysical Flows, University of  
Waterloo, Waterloo
- 2010 Institute for Mathematics Applied to Geosciences, National Center for Atmospheric Research,  
Boulder, USA  
Wave Phenomena IV, University of Alberta, Edmonton
- 2011 Canadian Mathematics Society Winter Meeting, Toronto
- 2014 Advances in Fluid Mechanics X, A Coruna, Spain
- 2017 Canadian Mathematics Society Winter Meeting, Waterloo (declined)
- 2018 Canadian Symposium on Fluid Dynamics, Toronto (declined)
