**Completed but not yet Published**

"Phenomenon-based Classification" and "Basic Concepts Classification" for *Dictionary of Knowledge Organization*. The 4<sup>th</sup> ed. of *Introduction to Interdisciplinary Studies* has been submitted and copy-edited. The 5<sup>th</sup> ed. of *Interdisciplinary Research: Process and Theory* has been submitted.

**Research in Progress:**

"Classification and Interdisciplinarity" This multifaceted project is part of an even larger research program focused on showing how interdisciplinary research is best performed, and in particular how it can be aided by the various classifications I have developed in previous work. I continue to develop my arguments that scholarly documents can and should be classified with respect to universal and exhaustive classifications of phenomena (and the relationships among these), theories, and methods. I am now applying this classification also to artifacts, works of art, archival documents, and the Semantic Web. Last but not least I continue to develop the Basic Concepts Classification.

I have begun a collaborative project on interdisciplinary activism.

I have begun a project on bibliometric analysis of interdisciplinary literature.

I and three others developed a plenary panel for a conference in November 2024, and are hoping to publish our findings.

**Awards for Research:**

Best Paper Award, International Society for Knowledge Organization conference, Wuhan, China, March 2024.

My *Making Sense of World History* was named "Outstanding book in humanities and social science" for 2020 by Taylor and Francis. It also won the Open Access Award for Media and Arts. <https://www.routledge.com/go/2020-book-and-digital-product-awards>

Boulding Award, Association for Interdisciplinary Studies, October 2018. For contributions to scholarship of interdisciplinarity. McCalla Professorship, University of Alberta, 2001-2. This competitive award provided full release from teaching during the academic year in order that I could devote my time to research.
